

IAM INSIGHTS DASHBOARD

IDMWORKS IAM Insights Dashboard offers a one-of-a-kind, vendor-neutral solution with real-time aggregate monitoring in a single customizable dashboard. With this unique cloud-based service, organizations save time, reduce potential downtime and risk with visibility across all vendor solutions, including critical IAM program KPIs for the most popular Identity Management Software offerings, Regulatory Compliance Adherence, Security Incidents and Events, Infrastructure Health, and Service Tickets.

THE CHALLENGE

The IAM market is complex, with hundreds of vendors across different identity security domains. Most enterprise IAM programs have solutions from dozens of vendors. Each vendor has its own approach with purpose-built reporting across multiple interfaces and dashboards, leaving IAM leaders with disparate reports that lack a common framework offering neither program-wide visibility nor intelligent insights.

Before today, companies couldn't gain business insights across the entirety of their identity security program in a timely manner to make crucial strategic decisions.

MULTI-LAYER INSIGHTS

- + BUSINESS LEVEL**
 - Executive summary dashboard
 - Compliance/Governance roll-up information
 - Configurable alerting
- + PROGRAM + PRODUCT LEVEL**
 - Product insights for most popular security technologies
 - Infrastructure monitoring
- + SECURITY LEVEL**
 - Security incident and event monitoring for managed IAM technologies
- + OPERATIONS LEVEL**
 - Managed support incident summaries

INSIGHTS KEY BENEFITS

- STRATEGIC INSIGHTS**
 - Real-time, aggregated monitoring and reporting across multiple IAM vendors gives access to the broad and deep real-time insights needed to drive IAM program strategy with a common framework.
- SINGLE, HOLISTIC VIEW**
 - IAM Insights offers proprietary reporting integration and coalition into a single dashboard view across multiple technologies.
- OPERATIONALLY EFFICIENT**
 - Stop wasting valuable time trying to patch together disparate reports across different vendor interfaces and multiple dashboards.
- EASILY CUSTOMIZABLE**
 - A flexible, intuitive interface delivers customizable report insights and views. Cloud-based services offer easy, real-time access with 24/7/365 Support.
